World History Geography Project: 7 Continents

Seven groups will create presentations over one of the world's seven continents. Continents and groups will be selected randomly in the class. Presentations should include:

1. Location of the continent
2. The major weather patterns found in the continent: example hot with little rain, snowy and icy – describe in detail
3. Major countries of the continent – remember you do not have to list all of the countries just the most powerful countries on your continent
4. Major geographical systems such as rivers, mountains, landforms, etc.
5. Major cities or population centers

Groups will create posters for display with the above information. Once the poster is finished the group will present their findings to the class. All group members must participate in the creation of the poster and the presentation, itself.

Each student will then rank the continents (1-7) based on their level of importance in the world. After the continents have been ranked, students will need to write at least one sentence about each justifying why you ranked the continent the way you did.
