

A.) Groups of 2 will create displays showcasing colonial life. Groups will research life in the colonies using their books (pages 100-106), and the Internet to construct the displays which will consist of:

1. a New England village,
2. a Middle Colony city, or
3. a Southern plantation

Three days will be spent working on the project.

B.) Students will write a short paragraph discussing their hypothesis over the effect the slave trade had on African societies. They will need to consider the following bits of information.

1. Europeans provided guns to Africans so they could capture other Africans for the slave trade.
2. Most captives were healthy men and women between the ages of 15 & 25.
3. African traders received luxury items in return for the captives they provided.

-Students will then research to see if their hypothesis is correct. What impact did the above statements have on African society?
